1. This Office Action is the answer to the amendment received on 4/07/2005, which paper has been placed of record in the file.

Status of the claims

2. Claims 1-3, 5-6, 8-9, 11-13, 15-16, 19-21, and 24 are pending; claims 4, 7, 10, 14, 17-18, and 22-23 are canceled.

Priority

3. This application is a CIP of US application serial no. 09/060,026 filed on 4/14/1998, which is US Patent 6,069,955.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

4. The following is the Examiner's statement of reasons for the indication of allowable subject matter:

The prior art closest to the common subject matter of the independent method claims 1, 16, and 21 are the references to Berson (US Pat. 5,768,384), Doljack (US Pat. 6,442,276), Kowalski (US Pat. 6,152,367), and Kowalski (6,058,481), these references do not teach or suggest:

A system for verifying authenticity of a manufactured product with an ability to determine the authenticity of an article by using a zero-knowledge protocol to decrypt information contained in an electronic tag attached to the article (if the public key used at the point of sale cannot decrypt the tag, the article is a counterfeit; and if the routing information at the point of sale does not match up with the decrypted routing information stored on the electronic tag, then the article is a fake).

5. Dependent claims 2-3, 5-6, 8-9, 11-13, 15, 19-20, and 24 are allowable because they are dependent on their parent claims 1, 16, and 21.

For the reason discussed above, the application is now set in a condition for allowance due to none of the references of record, teaches or fairly suggests the recited limitation as claimed.

- Claims 9, 12, 13, 15, 16, 19-20, 21, and 24 are renumbered as claims 7, 10, 9, 4, 14, 15-16, 12, and 13.

6. Note: Ogihara et al. reference (US Pat. 6,880,753) is not proper for a priority date; furthermore, it does not teach about using zero-knowledge protocol for authentication.
